PROFILE SUMMARY

Junior Frontend Developer with experience building clean, responsive web applications using Vue.js, React.js, JavaScript, Firebase, and modern frontend technologies. Skilled in developing reusable components, integrating REST APIs, implementing authentication systems, and creating user-friendly interfaces across devices. Experienced in component-based architecture, state management, responsive design, and frontend performance optimization. Background in administrative and remote support roles, bringing strong communication, organization, and problem-solving skills to development teams. Passionate about continuous learning and contributing to impactful web solutions.

WORK EXPERIENCE

- Elori Global Services** 2023 - 2024
Administrative Support
- Provided administrative and operational support in a hybrid/remote environment.
 - Managed digital records, documentation, and data entry with a focus on accuracy and organization.
 - Supported daily workflows using Google Workspace and Microsoft Office; coordinated tasks and tracked progress.

PROJECTS

MOVIE DISCOVERY APP

- Built a movie discovery app using Vue 3, Pinia, and movie APIs.
- Implemented dynamic routing, Firebase authentication, favorites, and responsive UI.
- Applied component-based architecture and API integration best practices.

E-COMMERCE FRONTEND

- Built an e-commerce frontend with product listing, shopping cart, and checkout flow.
- Implemented LocalStorage cart persistence and responsive layouts.
- Developed reusable UI components for scalability and maintainability.

WEATHER APP

- Built a weather application using Vue.js and a public weather API.
- Implemented real-time weather updates based on user location input.
- Designed responsive interfaces optimized for desktop and mobile devices.
